

# How to set up your co-bot 20 cooking assistant

## Introduction

Are you too busy to cook? Have you ever cooked with water?  
This robot helps with cooking. This robot can cook nearly anything.

## Description

The robot can change heights. The cooking assistant is waterproof because if he cook with water and accidently spills it on him, he might stop working. So if he is waterproof he will be working even if water spills on him.

## Equipment

Oven gloves will his hands whilst putting something in the oven.

Apron protects his power box.

Food.

Cooker.

Fire extinguisher.

Memu and Activity Sheets

Fun things to put the food in like a happy meal box.

## Instructions

1. Firstly, turn it on by feeding it a piece of fruit.
2. Next, press the microphone button and tell the robot what you would like for a meal. This is an important instruction in case you have allergies.
3. After that give the robot space to cook.
4. Then leave the robot time to cook.
5. When ready the robot delivers to the dining room table
6. Feed the robot something unhealthy to turn it off.
