

A Tricky Problem

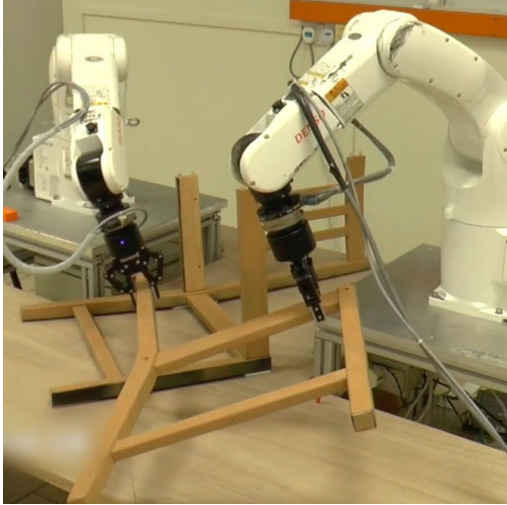

Yesterday a disaster struck Fairy Tale Village's glitter factory.

The glitter factory opened at 08:30 as usual. However, today following a large order of glitter by the party fairies which led to an increase in glitter production. Disaster struck when the glitter machine exploded and covered the entire factory with glitter. Glitter production has now stopped.

Grace the glitter fairy the owner of Fairy Tale Villages glitter factory explained that a Magical handyman robot called "Hand521" has been brought in to tidy the glitter and repair the machines.

Hand521 can separate glitter from all other materials and can contain even the largest of glitter spillages with an amazing HEPA filter which captures the smallest of particles,

“ We are hoping that Hand521 will complete the clean up by the end of today and glitter production will resume tomorrow although less glitter will be produced for safety reasons” states Grace, the factory owner.

This will be of great relief to the party fairies. “ We ordered the glitter for young fairies parties,” said Polly the party fun fairy.
