

Headline: **APOLLO the Robot who Saves the Day!!!**

Date:

April 3rd 2020

Author:

By Luca Ormonroyd

What Happened: There was a big fire and no cars were allowed to go near the fire but one car did. While the car had stopped the fire-men went to tell the person in the car to drive away but there was no-one in the car!!! The fire-men tried and tried and tried until all of a sudden the car turns into a small type of army truck!!! The tank sprays high pressured water which turns into a wall of water and puts out the fire. At the end the Robot rebuilds the people's houses!!!

When did it Happen? Who Needed Rescuing and Why?

The big fire was at night. The people needed rescuing because their houses got burnt down. Also, the fire men needed help because SO, SO hot they could have burnt alive!!!

What are the Robot's Special Features that helped in the rescue? Apollo has a fire resistant coat with tools to fix houses on board. The robot has more special features like spraying water out of the robot's arm, high pressured water gun spraying a wall of water, tank treads to move upstairs and down, also to move quickly.

Special Quote:

The best way to predict the future is to invent it.
