

**You're the teacher**

Take care when you write the numbers in each question in columns.  
Check that you have written each number or amount correctly before you do the calculation.

1. Here is a copy of Mike's test paper. Use column addition to check each answer. Use the space on the right to show your working. Tick the correct answers and write the correct answers for the ones he got wrong.

**Mike Jones      12 May 2014**

1.  $£1.45 + £1.78 + £2.43 = £5.73$

$£5.66$

2.  $£2.99 + £4.28 + 68p = £7.97$

$£7.95$

3.  $£2.37 + £8.25 + £1.12 = £11.74$  ✓

4.  $£7.70 + £7.07 + 70p = £21.77$

$£15.47$

5.  $98p + £3.69 + £6.16 + 46p = £11.26$

$£11.29$

6.  $£16.72 + £56.88 + £31.99 = £104.60$

$£105.59$
