

Place value in decimals

1. Give the place value of the circled digits in each of the following numbers. Look carefully at the position of the decimal point.

- a. $1\textcircled{5}.27$ b. $9.\textcircled{3}6$ c. $14.7\textcircled{5}2$ d. $24.0\textcircled{3}$
- e. $6.42\textcircled{9}$ f. $\textcircled{3}0.054$ g. $4\textcircled{7}.002$ h. $56.\textcircled{7}51$

2. What are the values of the letters X, Y and Z?

3. Draw arrows to show these numbers on the number line.

4. Draw arrows to show the approximate positions where these decimal numbers go on the scale. Be as accurate as you can.
