

Explain the mistake

$$\frac{3}{4} \times 5 = \frac{15}{20}$$

Rank by difficulty

This means order these calculations from the easiest to solve to the hardest.

$$\frac{1}{4} \times 5$$

$$\frac{3}{10} \times 3$$

$$\frac{3}{4} \times 3$$

How many ways?

$$\frac{\square}{4} \times \square = 3 \frac{3}{4}$$

Level 1: I can find a way

Level 2: I can find different ways

Level 3: I know how many ways there are
