

8. For these questions you need to work backwards using the inverse operation.

Let's guess that the finishing number is 2,000,049 as this rounds to 2,000,050 to the nearest 10.

$$\begin{array}{r} 2,000,049 \\ - 250,000 \\ \hline 1,750,049 \end{array}$$

(250,000 is one quarter of one million)

$$\begin{array}{r} 1,750,049 \\ + 500,000 \\ \hline 2,250,049 \end{array}$$

(500,000 is half of one million)

$$\begin{array}{r} 2,250,049 \\ - 200,000 \\ \hline 2,050,049 \end{array}$$
