

1. Yes Eva is correct.

$$3,257 \times 4 = 13,024$$

If I look at the ones, I can see I will need to do 7×4 .

$7 \times 4 = 28$, so the answer must end in an 8.

To check:

$$\begin{array}{r} 3,257 \\ \times \quad 4 \\ \hline 13,028 \\ \hline 1 \quad 2 \quad 2 \end{array}$$
