

A place value grid is used to solve

$$0.7 + 0.5$$

Ones	Tenths
	
	

Jasmine thinks the answer is 0.12

What mistake has she made?

You will need a partner and a dice for this game.

Take it in turns rolling a die and place the digits in the blank spaces above. Record the number in a table.

Swap over with your partner.

Roll again and add your new number to the first number. The winner is the person who after 4 rolls is the closest to 1.5 **without** going over.
