

Ravi has some 50p coins and some 20p coins in his money box. He has a total of £10.40. If he has 3 more 20p coins than 50p coins, how many 50p coins and 20p coins does he have?

$$14 \times 50p = £7.00$$

$$17 \times 20p = £3.40$$

$$£10.40$$
