

Moving Up Task

For your activity today, I would like you to decorate a number 4 to go up on display in our classroom ready for September.

Start by finding a photo of you which you really like and stick it in the middle. Write your name in the middle too if it will fit, if not do this somewhere around the four.

Everyone in our class is different. We all have different talents, enjoy doing different things, like different subjects and foods and have different pets.

However, we have one big thing in common—we are all going to be in Class Four in September, so that's why we are decorating a number four. This is what joins us all together.

Have a think about the different things you like/enjoy. You might want to write a list or make some notes on a spider diagram. Then think about how you want to set these ideas out on the number four.

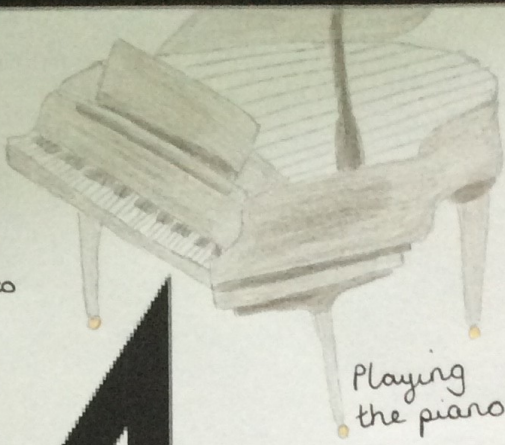

I really like drawing, but like having something to copy/imitate. I Googled each thing and then had the images up on my laptop to imitate. For Flash and Fred, I had some real photos of them to help me. You might find this helpful too.

On the next two pages are the number fours Mrs Soley and I have created. Have a look at them to find out a bit more about us.

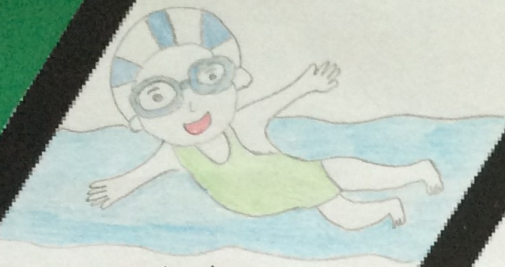

I really look forward to seeing your creations and finding out more about you.

Enjoy!
