

# More numbers up to 1000

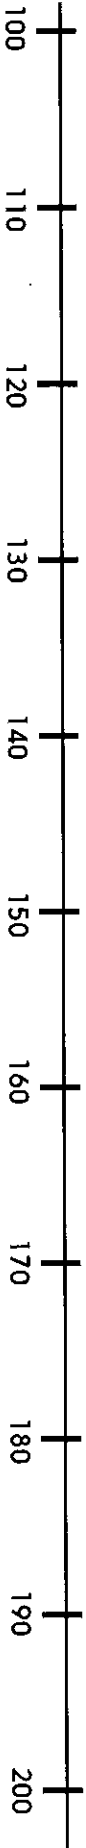

## Sheet 1

Mark each pair of numbers on the line. Write  $<$  or  $>$  between each pair.  
Write a number that you know comes between each pair of numbers.

135      153

162      165

125      111

172      169

123      118

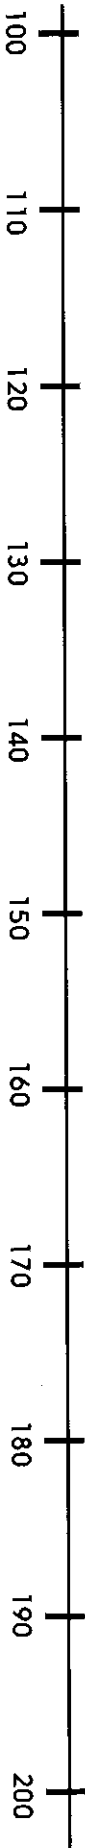

154      156

143      145

188      185

132      123

115      118

199      119

136      138

# More numbers up to 1000

## Sheet 3

1. Write  $<$  or  $>$  or  $=$  between each pair of numbers.

343

434

565

559

701

699

329

239

201

$200 + 1$

2. Write a number in each box to make each sentence true.

$< 300$

$424 >$

$930 =$

$> 582$

$401 >$

3. How many different odd numbers could be written in the box in this sentence? How many even numbers?

$707 >$

$> 695$

4. What number is exactly halfway between 201 and 303?

Draw a line to help you work it out.

5. How many odd numbers will there be on this number line?
