

True or False?

1 is a factor of every number.

1 is a multiple of every number.

0 is a factor of every number.

0 is a multiple of every number.

I am thinking of two 2-digit numbers.

Both of the numbers have a digit total of 6

Their common factors are 1, 2, 3, 4, 6, & 12

What are the numbers?
