

Dear Chac

Thank you Chac for bringing rain down to the ground from the clouds and to allow the whole world to be able to eat and drink. Thank you for watering the crops with the rain from the clouds, which is providing us with the much needed food.

You can make it rain when its really dry, you can make the grass and crops grow.

Please may you keep this happening so there is no starvation around the world.

Thank you for doing your amazing job and for being the Supreme God of rain and thunder.

AMEN
