

Lisa says.

5^3 is equal to 15

Is she correct?

Caroline's daughter has an age that is a cubed number.

Next year her age will be a squared number.

How old is she now?

The sum of a cubed number and a square number is 150

What are the two numbers?

Jenny is thinking of a two-digit number that is both a square and a cubed number.

What number is she thinking of?
