

# DINOSAUR SKELETON FOSSIL

You will need:

Playdough (either bought or homemade)/clay/blu tack/plasticine

Rolling pin/bottle

Cocktail sticks/sharp pointed tool/pencil

Plastic knife

A4 paper

1. I used the paper to roll out the playdough as it may mark your surface.
2. Roll out a rough circle ready to make your fossil imprint.
3. Choose a fossil to copy.
4. I did not want my playdough to mix as it belongs to my grandson so I moulded the shapes on the paper and lifted onto the yellow circle.
5. It was quite fiddly but hopefully your smaller fingers will find this a bit easier. I found using the tool to lift the playdough was useful and it didn't spoil the shape I had just made.
