

Reading and writing large numbers

When you write a number, think about what each digit represents.

Watch out for the zeros.

For nine thousand and six, write 9006. The '9' digit is in the 1000s place, so don't write 90006!

1. Write these amounts in figures.

- forty-three _____
- two hundred and seventy-eight _____
- five thousand, nine hundred and sixty-one _____
- twenty-one thousand, six hundred and eighty-three _____
- four hundred and fifty-seven thousand, nine hundred and thirty-two _____
- seven thousand and nineteen _____
- ten thousand and two _____
- eighty-eight thousand and eight _____

2. Write these amounts in words.

- 105 _____
- 150 _____
- 8006 _____
- 8060 _____
- 8600 _____
- 6008 _____

Place value in large numbers

112

When you are working out how many 100s there are in, say, 4516, remember that there are 10 hundreds in 1000. So, $4516 = 45 \text{ hundreds} + 16$.

1. Match the answer to each problem with the same amount in words. The first one has been done for you.

- | | |
|---------------------------|--|
| a. $368 + 320 = 688$ | One thousand and seventy-two |
| b. $4290 + 14 =$ _____ | Twenty-four thousand, one hundred and fifty |
| c. $1472 - 400 =$ _____ | Six hundred and eighty-eight |
| d. $61,300 + 291 =$ _____ | Sixty-one thousand five hundred and ninety-one |
| e. $25,000 - 850 =$ _____ | Four thousand, three hundred and four |

2. Write down the answer in the first box. In the second box, give the value of the 7 in the answer. The first one has been done for you.

- | | |
|---|--|
| a. $384\text{ml} - 9\text{ml} =$ <input type="text" value="375ml"/> <input type="text" value="70ml"/> | b. $443\text{cm} + 14\text{cm} =$ <input type="text"/> <input type="text"/> |
| c. $758\text{mm} + 8\text{mm} =$ <input type="text"/> <input type="text"/> | d. $990\text{cm} - 260\text{cm} =$ <input type="text"/> <input type="text"/> |
| e. $1.43\text{m} + 5.30\text{m} =$ <input type="text"/> <input type="text"/> | f. $7095\text{m} + 50\text{m} =$ <input type="text"/> <input type="text"/> |
| g. $8020\text{g} - 25\text{g} =$ <input type="text"/> <input type="text"/> | h. $\text{£}4762 - \text{£}8 =$ <input type="text"/> <input type="text"/> |

3. Give the answers to the following problems in figures.

- a. How many tens in three hundred and eighty-seven? _____
- b. How many hundreds in twenty-four thousand and fifty-six? _____
- c. Which is less: 53 hundreds or five thousand, two hundred? _____
